

MIKROTRACK™

The first reusable footwear and tire track impression mould
MikroTrack™ creates a perfect three-dimensional impression with accurate recording of all pertinent information in the evidence. The MikroTrack™ impression can be stored and will not dry. Once photographed, just mould it back together and it's ready to use again.

MikroTrack™ is developed by Kjell Carlsson Innovation. For ordering enquiries contact your local crime scene product supplier and for technical enquiries contact Kjell Carlsson Innovation at www.carlssoninnovation.se

Making a three-dimensional test impression from a tire, with a wet tire you will get a better release.

Making a three-dimensional test impression from a shoe, with a wet shoe you will get a better release.
